ENERGETIC PROTECTED SURFACE GRAFFITI REMOVER

DECAGRAF

DECAGRAF

DESCRIPTION

DECAGRAF is a product formulated for removing spray graffiti, painted marker on smooth surfaces or with anti graffiti
The participants in its formulation components are biodegradable and do not involve environmental damage. Not corrosive. Completely removes all graffiti from non-porous surfaces such as vinyl, pvc, painted metals, etc.. and on any surface where you want to preserve maximum support without damaging it with more energetic or aggressive products

APLICACION

DECAGRAF comes in liquid form. It can be applied by spray, rag, brush or roller. Leave for 3-10 minutes depending on whether the substrate is painted or not. If painted, leave on for 1-2 min. And remove the residue with water gently spray. If the substrate is painted, make a test to buy the support bar is not going to hurt. Repeat as often as necessary to completely remove the graffiti.

PRECAUTIONS

DECAGRAF is biodegradable, non-corrosive and non-flammable.
Use with caution on painted surfaces.
Wear gloves and goggles.

PERFORMANCE

PERFORMANCE: 3-6 m²/kg
